	\$1,622 94
Leaving a balance due from the town, of	\$1,333 61

CARR HUSE, } Selectmen of  
E. W. MASON, } Hill.

## REPORT

*Of the Superintending School Committee for the year ending March 11, 1862 :*

### DISTRICT No. 1.

Two Summer terms of 14 weeks, taught by Miss Eliza H. Merrill, assisted, the first term of 7 weeks, by Miss Sarah G. Sumner. Order, average. The teachers were diligent, and by their industry the school was much improved.

Winter term of 9 weeks, by Miss Emelie Hersey, who notwithstanding her thorough scholarship and good intentions, failed to govern the school to the satisfaction of either herself or the Committee, and, of course, her usefulness was considerably limited. The school was large, the classes numerous, and what was still more detrimental, the relics of the old past, whispering and idleness, were still visible, claiming, like Southern rebeldom, to be let alone, but making haste *very slowly to secede*. To abate this nuisance effectually will require the determined co-operation of teachers, parents and committees; and without this united effort, much of the money expended in this District must be lost. The school-house having been remodeled, is second to few, if any in the County, and it is hoped the school will soon undergo a corresponding improvement in its order and advancement.

### DISTRICT No. 2.

Winter term of 8 weeks by Cyrus W. Bartlett, who, though inexperienced, proved a faithful and profitable teacher, acting his part, it is believed, to the satisfaction of all concerned. Advancement good, considering the length of the term.

### DISTRICT No. 3.

Summer and winter terms of 6 weeks each, both taught by Mr. M. Proctor Favor, who is a thorough scholar and a successful disciplinarian. Schools much improved. The services of such teachers are very desirable.

### DISTRICT No. 4.

Summer term of 6 weeks, by Miss H. Annie Colby. This school was quiet and profitable, all the classes appearing well at the close. Winter term of 8 weeks by Mr. C. W. Moody, who from some cause failed to secure the confidence and good will of a large portion of both parents and scholars. The school was deserted by most of the pupils, and of course, proved a failure.

### DISTRICT No. 5.

Two Summer terms of 20 weeks, both by Miss Georgie F. Fowler, energetic and persevering in the discharge of her duties. Improvement in the several branches taught was marked. One of our best schools.

### DISTRICT No. 6.

Summer term of 5 weeks, by Miss Mary L. Parker, a good scholar, patient and devoted as a teacher. Useful school.

Winter term of 6 and 2-5 weeks, by Mr. John Emery, a faithful, thorough and devoted teacher. It is believed that nearly all the scholars made commendable improvement.

### DISTRICT No. 7.

Summer term of 8 weeks, by Mr. John Emery, a teacher of much experience. The school gave evidence of good improvement.

## DISTRICT No. 8.

Winter term of 8 weeks by Mr. John Emery, a teacher of experience and much originality of thought, who teaches every thing understandingly. So far as the Committee could see the improvement was good.

## DISTRICT No. 9.

Winter term of 6 weeks by Mr. Silas P. Thompson who ranks with our best teachers. Both teacher and scholars did themselves honor and the school was a complete success.

## DISTRICT No. 10.

Summer term, by Miss Addie H. Sargent, 6 weeks. The teacher was faithful and succeeded well, and the improvement was good considering the length of the term and other circumstances hereafter mentioned.

A second summer term of 6 weeks was taught by Miss Ellen M. Pettengill, a young, inexperienced, but apparently faithful teacher. The Committee think the school was not very profitable from the following reasons: the scholars were very irregular in the attendance, only one attending regularly through the entire term. Another reason was a great deficiency of text-books. It is believed there is a want of interest in parents.

Our schools, during the present year have, with two or three exceptions, been conducted to the satisfaction of the Committee, and it is believed that the cause of education has suffered no retrograde movement. All experience teaches that the greatest obstacle to success in common school education, is want of qualification in teachers. It must not be forgotten, however, that book knowledge constitutes only a part of a successful teacher. Children are very imitative animals, insomuch that not only the written copy set by the instructor is imitated, but the teacher himself becomes a living copy, whose deficiencies in the refinements and courtesies of life the pupil almost involuntarily follows. In a well managed school, the scholar naturally and properly forms a high estimate of the teacher, and tenaciously imitates his or her qualities, whether of manners, intelligence or morals, and hence the great importance of placing before children models worthy of imitation. Let it be remembered that teachers of the best stamp are "few and far between," and cannot therefore be secured, except for a liberal compensation. It is the settled conviction of the best judges that the cheapest schools are almost invariable the dearest.

The great problem, whether the masses are, or are not capable of self-government, is now being solved. We are on the point of demonstrating to the world that the virtue and intelligence emanating from our free institutions will bring us out of the present struggle purified and disciplined, even to the defiance of similar emergencies in the future. If one thing more than another is calculated, under God, to shield us against both foreign and domestic foes, it is the intelligence of the masses, regulated by the mild, but unyielding influences of Christianity.

As the gloom of war is calculated to extinguish the lights of science, let us "In time of war prepare for peace" by guarding and perfecting that most lovely feature of our government, our free school system.

GEORGE W. SUMNER, } Superintending School Committee  
RUFUS FELLOWS, } of the Town of Hill.
